Product Description

What is CAS 936616-33-0 Cosmetic Anti Wrinkle Muconopeptide Conotoxin Peptide?

conotoxin is one of a group of neurotoxic peptides isolated from the venom of marine cone snails (genus Conus). Conotoxins are polypeptides consisting of 10 to 30 amino acid residues, usually with one or more disulfide bonds. Conotoxins have multiple mechanisms of action, most of which have not been identified. However, many of these peptides appear to modulate the activity of ion channels. Conotoxins have been the subject of pharmacological interest for the past several decades.
